REASONS FOR ALLOWANCE

1. The following is a Patent Office's statement of reasons for allowance:

The prior art does not teach or fairly suggest all of the limitations of the claimed invention including a method of manufacturing a sequentially joined-segment stator coil of a rotary electric machine with the step of joining said segments in said stator core in sequence to complete a stator coil, wherein the head press member retains each of the pairs of tines to be rotatable about an axis extending in alignment with an axis about which the rings rotate, each of the pairs of tines being allowed to rotate following rotation of the rings, or wherein one of each pair of the tines which is urged inwardly of the rings by the tip portion of the head of a corresponding one of the segments has a first chamfered surface to abut to the tip portion, and the other tine which is urged outward of the rings by the tip portion of the head of the corresponding one of the segments has a second chamfered surface to abut to the tip portion, the first chamfered surface being greater in radius of curvature than the second chamfered surface.

The Applicant's Remarks filed on 13th December 2004 (Cf. page 9), which are incorporated herein by reference and made a part hereof as though they were fully written, are persuasive to the issue of patentability.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
